

## Case Study – Office

### Client

Islington Council

### Project Name

27 Dingley Place

### Duration

17 Weeks

### Value

£600,000

#### Contract Administrator:

Islington Council Housing Property  
Services Architects

#### Architect:

Islington Council Housing Property  
Services Architects

#### Quantity Surveyor:

Islington Council Housing Property  
Services Architects

#### M&E Consultant:

Bailey Associates Ltd

#### Structural Engineer:

Consibee

### Description

Refurbishment of the building to be operated by Impact Hub Islington on behalf of Islington Council over three floors to accommodate tenants from local creative industries and install new platform lift within newly formed opening. The building had previously accommodated council services and a complete overhaul of the building space including mechanical and electrical services was required.

### Testimonial

*I have recently completed a project with Storm Building Ltd and found them a very professional company to work with. They were extremely conscientious in organising their operations to meet a challenging programme. This was down to the excellent quality of both site management and head-office support services.*

*The quality of the workmanship was very high and their willingness to collaborate with the design team to resolve site matters in a timely and cost effective manner was outstanding. I would not hesitate to recommend them*

**Fiona Monkman,  
Principal Architect,**
