£1,100,000

### Contract Administrator:

AK Design Partnership LLP

### Architect:

AK Design Partnership LLP

### Quantity Surveyor:

AK Design Partnership LLP

### M&E Consultant:

Status Design Associates LLP

### Structural Engineer:

Walker Associates

## Description

The Beacon Centre service is a 12 bed specialist Acute Adolescent Mental Health Unit which provides assessment and treatment services for young people at Edgware Community Hospital. The works involved the partial refurbishment of the main reception and existing ward to include the creation of a new HDU with individual patient rooms with en-suite, nurse's station with video links, lift access and secure external garden area.

## Testimonial

*Storm have been working with the Trust for several years now on numerous projects varying in value and complexity including working on wards ranging from Elderly/Dementia, Adolescent, Adult, Low and Medium Secure.*

*Frequently it is necessary for works to be carried out whilst wards remain occupied and I have always found Storm to be courteous, responsive, thorough and proactive without being overly 'contractual'. Their project management is excellent resulting in projects generally completing on time, within budget and with comprehensive O&M manuals. For projects of the right type, size and value Storm are "one of the first to go on the tender list"*
