

# Case Study - Healthcare

## Client

Hillingdon Hospitals NHS  
Foundation Trust

## Project Name

Beaconsfield Ward

## Duration

14 Weeks

## Value

£600,000

## Description

Refurbishment of an existing ward to provide a dementia care facility in a live hospital environment encompassing new medical trials for the treatment of dementia including “colour coding” of bed areas and individual bespoke colour coded artwork to each patient bed. The project also included a new landscape garden with pathways, benching planters and canopies, along with a private courtyard for the family bed unit.

## Award

Building Better Healthcare Awards Winner:  
Best Internal Environment Class

## Testimonial

*We find Storm easy to work with and committed to delivering the highest standards of quality and timeliness at a competitive cost. They particularly excel on larger projects but can equally undertake smaller complex jobs within live clinical environments. Storm recently completed an innovative, dementia-friendly ward refurbishment which won the Building Better Healthcare award in the Best Internal Environment Class and I firmly believe that no other contractor could deliver the superior finish and attention to detail for the same cost.*
